

ITINERARIO GEOLÓGICO  
EN LA PEÑA AMAYA -  
BURGOS

25 de noviembre de 2011

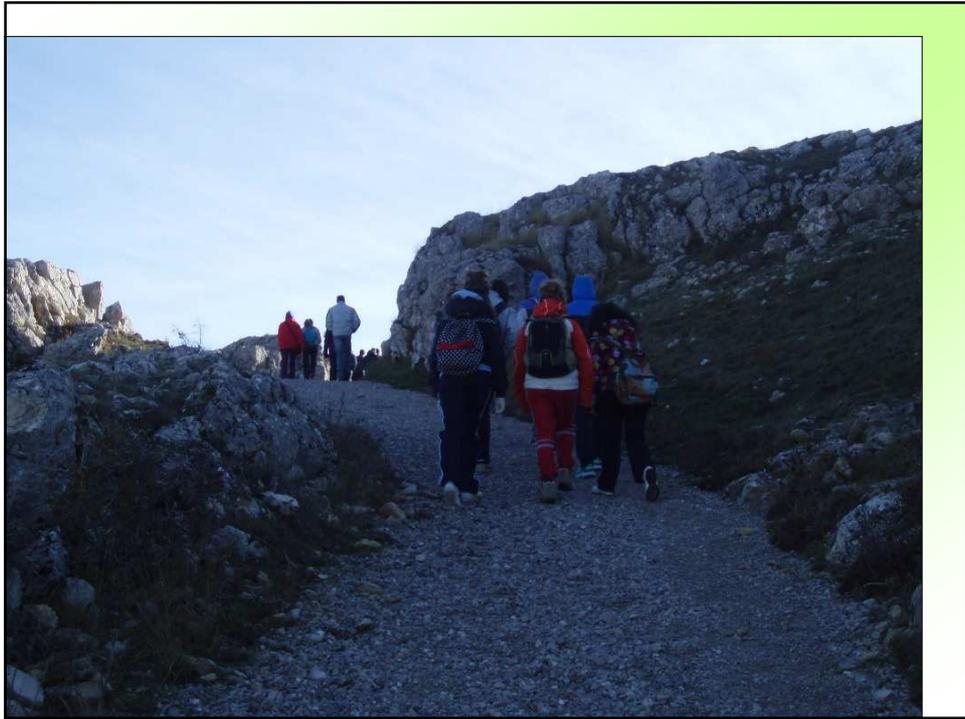

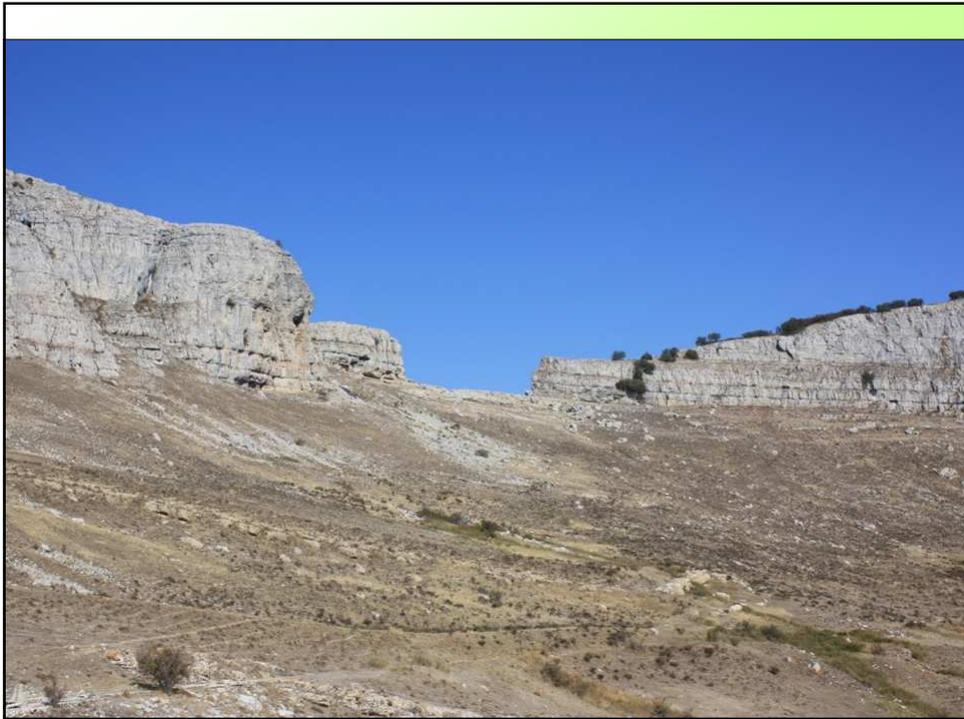

NUESTRO DESTINO...

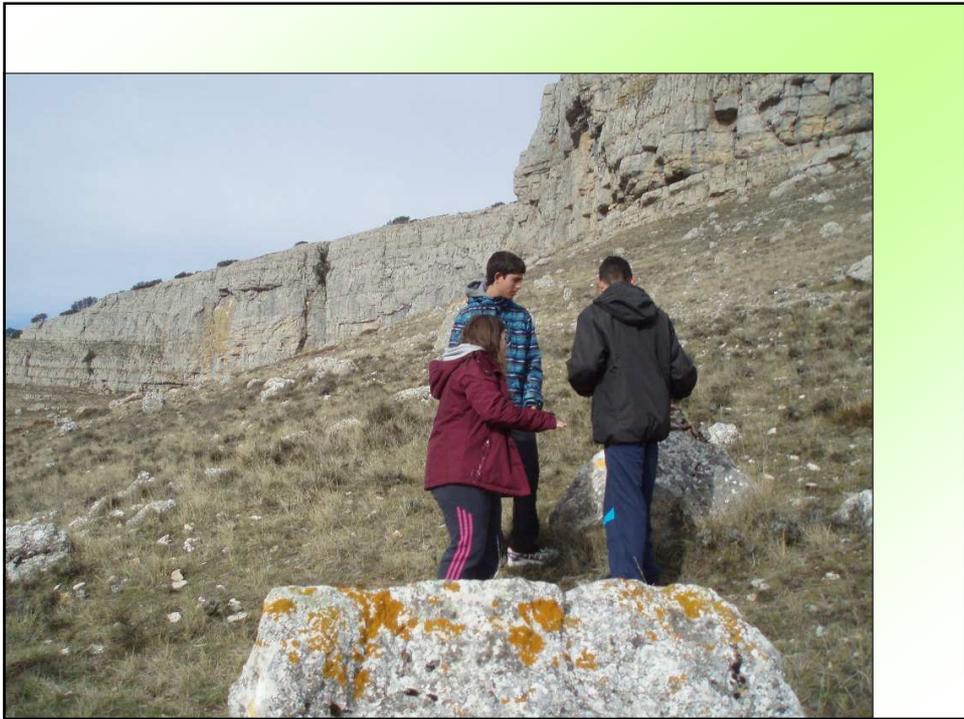

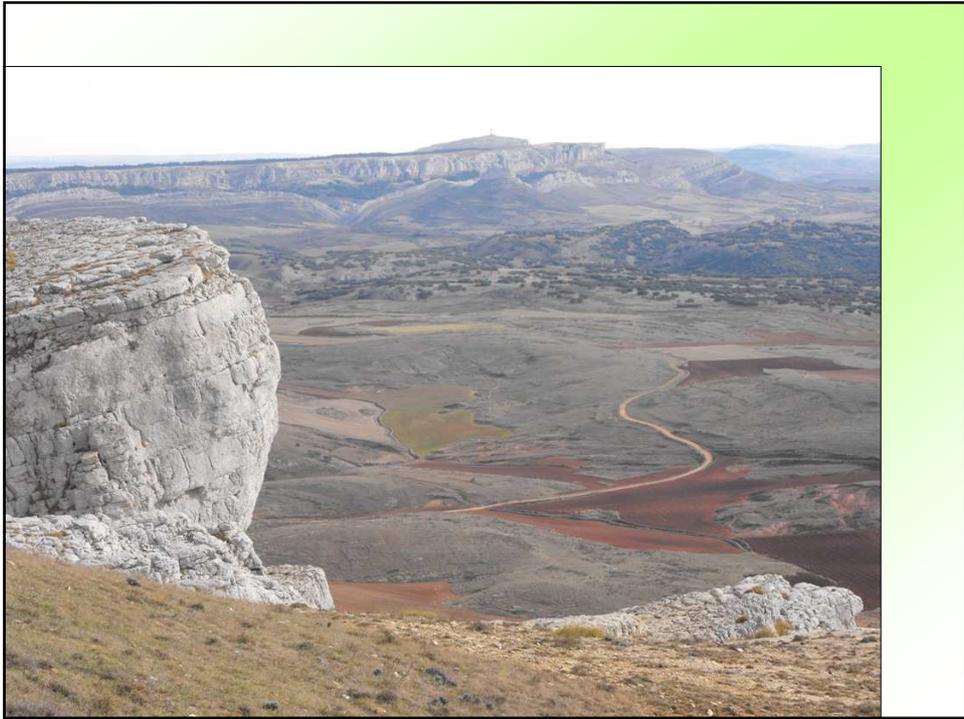

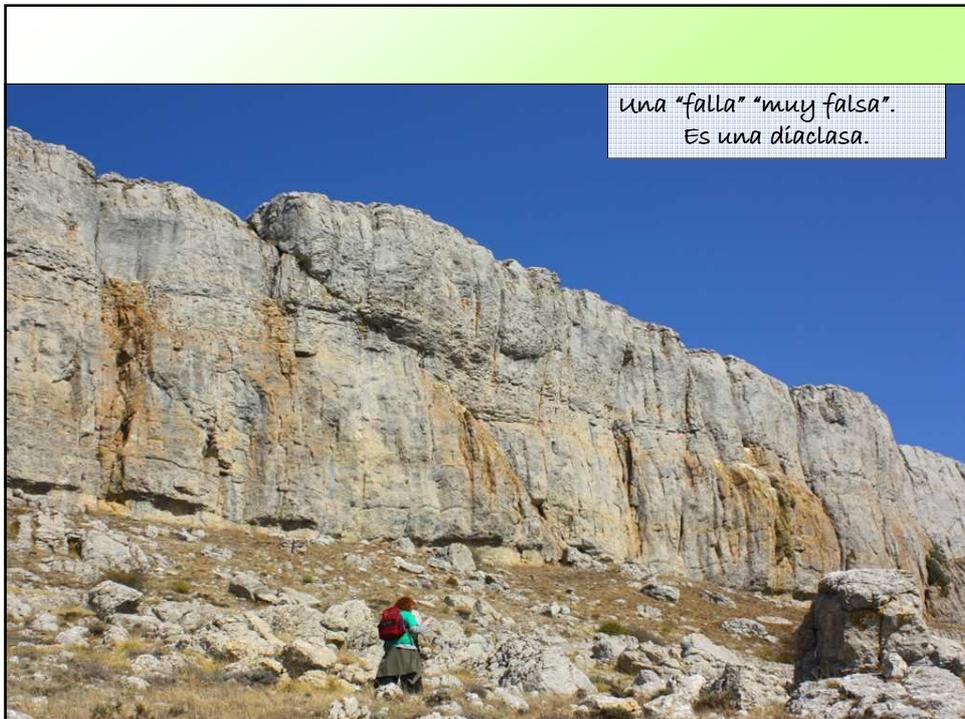

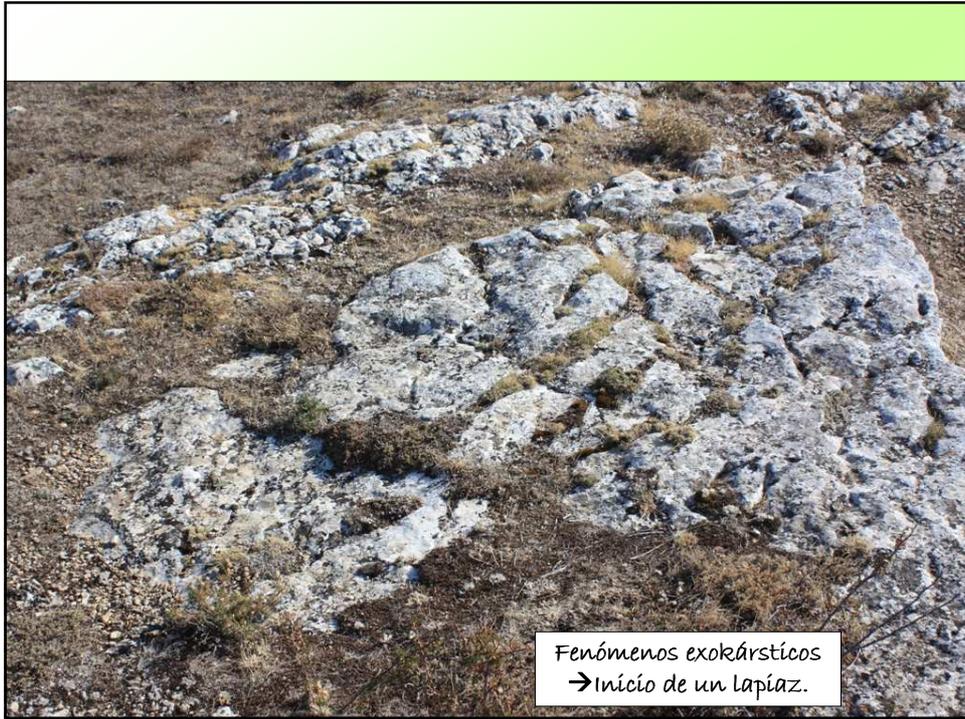

Esto sí son fallas.

Distintas vistas

This block contains three images and two text boxes. At the top left is a small topographic map with a red circle and a red 'N' with a cross symbol. Below it is a large aerial photograph of a mountain range with a red circle highlighting a fault line and a red 'N' with a cross symbol. At the bottom right is a smaller photograph of the cliff face from the top image, with a red circle highlighting a fault line. A text box at the top right says "Esto sí son fallas." and a text box at the bottom left says "Distintas vistas".

No todo tenía porqué ser roca....

Buitre leonado  
*Gyps fulvus*

Ovejas  
*Ovis orientalis aries*

Seta de cardo  
*Pleurotus eryngii*

*Lepiota excoriata*

También vimos algunos fósiles

## RESUMEN FINAL

### PEÑA AMAYA: PAISAJE GEOLÓGICO

Relieves dependientes de la estructura: relieves invertidos.

Relieves dependientes de la litología: relieves kársticos

- manifestaciones exokársticas.
- manifestaciones endokársticas.

Fallas vs. diaclasas.

Actividad tectónica.

Meteorización

- química.
- mecánica.

Fenómenos activos de gravedad.

Fósiles.
